# Banknote Sorter

## 6 Pocket Multiple Banknote Sorter

## The Banknote Sorter

---

---

The Banknote Sorter is a 3rd generation solution of for cash handling in banks, casinos, clubs, large retail outlets and CIT. Features and performance targets meet the strictest requirements of central banks and the high productivity levels expected by cash handling professionals. An innovative Image Analysis System combining latest sensor technology with the powerful software provides the highest security against counterfeits while banknotes are sorted in preselected quantity or value batches, smoothly and quickly, at single or continuous runs. Serial numbers and counting results of sorting, be it denomination, **fitness**, orientation or batches, can be printed or sent to a computer at the touch of a button. Operations are selected and activated by user-friendly graphics and text instructions displayed on an easy to read touch screen. The Skeletal structure and non-belt mechanism reduce the costs of operating and maintaining the sorter and the overall cash handling expenses of the user.
