

## disPOSer

### The amazing space-saver

Kiosk applications are becoming more and more complex and the need to accommodate a wide range of hardware such as change machines, banknote readers, payment terminals, ticket printers or ID card readers is increasing.

The disPOSer was developed in order to meet this trend head on. It enables large numbers of technical devices to be arranged and operated ergonomically and effectively within the smallest possible space.

Its versatility also extends to the user. With its low basic height of 130 cm, the terminal can be used unimpeded and with ease by adults, children and wheelchair users alike.

The disPOSer has a display attachment for grabbing attention. The eyecatcher can be used with or without backlighting and lends the disPOSer its required long-range effect.

### Standard configuration:

#### Housing:

- Standard steel and plastic housing
- Active speakers
- High-performance, low-noise fan

#### 17" touch screen display:

- Resolution: max. 1280 x 1024 pixels
